

## Backend Developer

### What You'll Do

- Work with development teams and product managers to ideate software solutions
- Design server-side architecture
- Develop and manage well-functioning databases and applications
- Write effective APIs
- Test software to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade software
- Create security and data protection settings
- Build features and applications with a mobile responsive design
- Improve our development process by introducing new practices or by building new tools
- Create valuable documentation that can help other team members in the future

### What We're Looking For

- BS in Computer Science or related technical field
- Proven experience as a Backend engineer or similar role
- 2+ years of experience building high-quality Web applications
- Knowledge of python frameworks ( e.g Django , flask) and JavaScript frameworks (e.g.Node.js , Next.js)
- Familiarity with databases (e.g. MySQL, MongoDB), web servers (e.g. Nginx , Apache)
- Experience working in a Test Driven Environment ideally with Continuous Integration and Continuous Deployment (CICD)
- A solid understanding of data structures and algorithms.
- Willingness to keep up with current standard practices and to try, learn and adapt to new technologies and programming languages
- Willingness to work on greenfield projects with the ability to take full ownership of your work, proactively ask questions about product ideas and positively challenge the team to ensure we're always building the right solutions

### Stand-out Qualifications:

- FinTech / Banking experience
- We are looking for Engineers who are willing to continuously improve our tools and learn new technologies. However, experience working with the following technologies/frameworks will be considered a plus:
  - Django/Node.js
  - Github and Github Actions
  - MongoDB or PostgreSQL
  - AWS

- EC2
- ECS/EKS
- RDS
- Cloudwatch
- Cognito
- Cloudfront
- S3
